

Closet Augers™

Three Foot Flexicore®

Guaranteed against manufacturing defects for a full year. This warranty includes damage to the cable, as well as the Closet Auger's other components.

Two layers of tempered spring steel are coiled tightly over a core of 49-strand wire rope. It gives the tool tremendous resistance to kinking.

The flexible down head follows bowl contours; springs through sharply angled passages while protecting inner walls from chipping or breaking.

Six Foot Teletube®

Makes conventional six foot augers obsolete, because it has three feet telescoped into a guide tube until you need it. After you've worked the first three feet into a bowl, you can go three feet farther simply by pressing a button and pulling the crank handle.

Outer tube is a big 1-1/8" in diameter; guide tube is even tougher than the steel rod we use in our 3FL closet augers. Teletube weighs just a little more than a 3FL.

Other features include vinyl bowl guard, vinyl grip handle, die cast aluminum turning handle, and "Grip Clip" for attaching cable.

Urinal Augers™

Gets through urinals where other snakes can't. A specially designed spring has the toughness and flexibility to negotiate tight urinal bends. Telescoping Teletube® model TU4 features a 48" spring for clearing stoppages beyond the urinal. The U2 has a 29" spring. Both models have rust resistant steel tubes and rubber bumpers to protect urinal bowls.
