(66 cm x 66 cm x 97 cm)

Have to work in a tight spot? Just pull the locking pin and lift the J-1400 pump and motor assembly off the frame.

Slide the J-1400 onto a cart with a hose reel and you have the J-1600. The specially designed cart has a heavy duty frame and rolls on two pneumatic tires. The hose reel has big capacity and comes with an adjustable brake and brass swivel. You can store extra nozzles and tools in a handy metal tool box bolted onto the frame.

The J-1400 pump and motor assembly locks securely to the frame for transport, yet it can be removed from the frame in seconds when you need to work in tight spaces.
