

Jet-Set™

Clears Grease, Sand and Ice

General's Jet-Set™ water jets clear grease from kitchen drains, flush sand and debris from culverts and drains, and melt ice clogs in minutes. They use a stream of high pressure water that hits the stoppage and flushes it away. The thrust of the nozzle drives the hose down the line and gives you wall to wall cleaning action.

JM-1450 Electric Jet

The compact, easy to use JM-1450 generates 1500 psi of cleaning power, yet pulls only 13 amps. The hose reel comes off in seconds to make it easier to get the machine in a car trunk. A convenient slide-out handle and eight inch wheels make it easy to roll the machine to and from the job. Safety features include a thermal relief valve, inlet filter, and back flow check valve.

JM-1450

Specifications:

Pump:
Triplex w/Vibrapulse®

Pressure:
1500 psi

Flow:
1.7 gpm

Motor:
1-1/2 hp 13 amp w/GFCI

Reel Capacity:
150 ft. x 1/4" hose

Weight:
105 lbs. (48 kg).

Dimensions:
27" L x 17-1/2" W x 32" H
(14-1/2" H w/o Reel).
(69 cm x 45 cm x 81 cm).

The hose reel comes off in seconds making it easier to get the machine into a car trunk.

Vibrapulse®

This is what separates General's Jet-Set from ordinary pressure washers. Vibra-pulse® breaks the initial tension between the surface of the hose and the walls of the pipe, helping the hose slide around tight bends and propels it farther down the line. Vibra-pulse increases the cleaning power of electric jets, and is particularly useful in jetting around bends in small drains.

See our complete Jet-Set™ catalog for more information.
